We are glad to state that Impression Events Venue is a car free area. We encourage our guests and clients to come here using the public transports as we are very closely situated with the bus and underground communications. As 95% of our events takes place on the weekends and majority of them are in the evening, so encourage our clients to use public transport as the prices of the tickets are low at that time. We also tell our guests that the underground is open till late and the night bus stop is just at the corner of the road where you can reach even before you finish the topic of your running conversation with your friend.

Out of our respect to our neighbours and the environment we would try do our level best to create awareness in the community for a safer neighbourhood. Keeping in mind the consequences of the free movements of the children in their play area and a safer way, we campaign to encourage people to limit using their cars in our premises.

We believe that to avail the best from the services of the public transport is to use it. The more we use public transport the more we take part in the development of this sector. Another fact is availing the public transport by the people makes an impact on the social change and change in our life style. Using the public transport decreases the risk of any unwanted situations. We always encourage our clients to come by public transport as it also minimises the scope of speeding on the road as the young persons become a bit hyper on any occasion.

Day by day the world is getting more polluted by the materialistic lifestyle. The environment is the first concern as it is polluted in various ways i.e. pollution due to the consumption of fuel, noise pollution etc. It should be our promise to the community to keep the level of pollution as low as possible. Again, the physical and mental health of the children is our priority concern. If we fail to provide a nice and safe planet for the future generation that would be our biggest loss no matter how high profit we make in business.

We believe that walking a while everyday would help us stay healthy. As our venue is just a few minutes' walk both from the underground and the bus, it is a chance for us to take a walk to reach here whereas we may not get this chance in our everyday busy schedule.

Considering all the above issues it is our humble request to everyone who is coming to our venue, to try to minimise the usage of private cars rather use the public transport.

All our small initiatives would make a bigger impact for a safe and environment friendly neighbourhood.
